

PrimeLink Job Posting

Job Title: Junior Field Engineer
Department: Network Operations
Reports To: Director - Outside Plant Operations

PrimeLink is a telecommunications service provider that has been in the industry since 1997. We are a proven leader in engineering solutions and recruitment with a record for success with both clients and candidates looking for the best jobs in the field. Our teams strengthen the infrastructure of our client base by specializing in outside/inside plant engineering, design, permitting, right of way, GIS mapping and project management. PrimeLink is dedicated to deliver our mission and commitment to clients and employees.

The Junior Engineer must be eager to learn. Will ultimately be responsible for a variety of high-level Engineering Assistant and Engineer functions.

Responsibilities include but are not limited to:

- Maintaining complex files, keeping records, preparing schedules, compiling and checking reports.
- Work closely with Sales to pre-qualify facilities and network equipment.
- Searching and investigating information contained in file, processing departmental documents requiring specific knowledge of functional operations.
- Communicate with all peers and departments to insure proper project planning.
- Maintain and investigate right of ways and easements for releases.
- Attend weekly construction meetings as needed.
- Must be proficient in various computer systems such as Microsoft Word, EXCEL, etc. The Engineering Assistant will have a high level of initiative and follow-up support.
- All other activities with respect to the needs of the business.
- Update and maintain GIS based mapping systems.
- Maintain DigSafe mapping database
- All other duties as assigned

Qualifications:

- Willingness to learn the trade and ultimately perform a variety of high-level Engineering Assistant and Engineering functions.
- Technical aptitude to learn Engineering functions and accompanying systems
- Basic knowledge of outside plant activities preferred.
- Excellent organizational skills, communication skills (written and verbal) and customer relations will be utilized in achieving desired results and are critical to the position.

- Some experience in right of way, private easement and permitting with local, state and federal entities preferred, not required.
- Basic knowledge of telecommunications outside plant preferred.
- Must be able to participate and learn to lead project teams to achieve team objectives and goals.
- Strong interpersonal skills
- Valid driver's license is required

Salary

Wage is based upon experience. Benefits include compensation time off, access to health insurance along with profit sharing.
